Unit 1 – Using Objects and Methods Name: **KEY**
HW 1

1) Below are two scrambled Java programs. Rewrite each of them correctly, following proper Java syntax and indentation.

a)

```
System.out.println("Hello, world!");
}
public class FirstProgram {
public static void main(String[] args) {
}
```

```
public class FirstProgram {
    public static void main(String[] args) {
        System.out.println("Hello, world!");
    }
}
```

b)

```
public static void main(String[] args) {
}
System.out.println("Step 2: Pretend to read it");
}
System.out.println("Step 1: Pick up the syllabus");
public class SecondProgram {
```

```
public class SecondProgram {
    public static void main(String[] args) {
        System.out.println("Step 1: Pick up the syllabus");
        System.out.println("Step 2: Pretend to read it");
    }
}
```

2) Match the following Java components with their correct definitions.

| | | | |
|---|---|---|---|
| `/* */` | `//` | `" "` | `;` |
| class | main method | `System.out.println()` | |

; a) Marks the end of a statement

System.out.println() b) Displays output to the screen

class c) A structure that holds methods and variables

main method d) The entry point of a Java program

// e) Used for line comments

/* */ f) Used for block comments

" " g) Enclose a String literal

3) Match each type of error with the correct example.

| Logic Error | Run-Time Error | Syntax Error |
|---|---|---|

Logic Error a) A program runs but produces incorrect results

Run-time Error b) A program tries to divide by zero and crashes

Syntax Error c) A missing semicolon prevents compilation
