Unit 1 – Using Objects and Methods Name: _____
HW 1

1) Below are two scrambled Java programs. Rewrite each of them correctly, following proper Java syntax and indentation.

a)

```
System.out.println("Hello, world!");
}
public class FirstProgram {
public static void main(String[] args) {
}
```

b)

```
public static void main(String[] args) {
}
System.out.println("Step 2: Pretend to read it");
}
System.out.println("Step 1: Pick up the syllabus");
public class SecondProgram {
```

2) Match the following Java components with their correct definitions.

`/* */`	`//`	`" "`	`;`
class	main method	`System.out.println()`	

_____a) Marks the end of a statement

_____b) Displays output to the screen

_____c) A structure that holds methods and variables

_____d) The entry point of a Java program

_____e) Used for line comments

_____f) Used for block comments

_____g) Enclose a String literal

3) Match each type of error with the correct example.

Logic Error	Run-Time Error	Syntax Error

_____a) A program runs but produces incorrect results

_____b) A program tries to divide by zero and crashes

_____c) A missing semicolon prevents compilation
